Request for Patent Term Extension
U.S. Patent No. 4,199,569

: INTERIM EXTENSION

Merck & Co., Inc., the owner of record in the Patent and Trademark Office (PTO) of U.S. Patent No. 4,199,569, filed an application for patent term extension under 35 U.S.C. § 156 on January 8, 1997. The original term of the patent is due to expire on October 3, 1997. The patent claims the active ingredient ivermectin in the human drug product "STROMEKTOL[®]," which was approved by the Food and Drug Administration for commercial marketing or use on November 22, 1996. An extension of 1,026 days is requested.

The initial PTO review of the application to date indicates that the subject patent would be eligible for extension of the patent term under 35 U.S.C. § 156. A final determination of the length of the extension of the patent term and issuance of a patent term extension certificate cannot be made until a final determination of the length of the regulatory review period is made. Since the original term of the patent would expire before a certificate of patent term extension can be issued, an interim extension of the patent term is appropriate.

An interim extension under 35 U.S.C. § 156(e)(2) of the term of U.S. Patent No. 4,199,569 is granted for a period of one year from October 3, 1997, the original expiration date of the patent.
